

SAHAR COHEN

SENIOR SOFTWARE ENGINEER

0525643902 • kermi2k@gmail.com • Israel • LinkedIn

Senior Software Engineer with 5+ years of experience designing and building scalable distributed web applications, serving millions of users. Strong background in full-stack development including frontend systems, backend services, data modeling, and cloud infrastructure. Proven end-to-end owner of complex features from requirements through production, with a strong focus on performance, reliability, and maintainable system architecture. Leverages AI-assisted development tools to accelerate delivery while maintaining high engineering standards

PROFESSIONAL EXPERIENCE

Self-Started Entrepreneur

Oct 2025 – Present

- Designed and built a full-stack SaaS automation platform from concept to production, architecting frontend systems, backend services, databases, and cloud infrastructure end-to-end
- Built complex frontend systems in React/TypeScript for monitoring operational data and workflows
- Implemented scalable Node.js service APIs with PostgreSQL data models (Prisma ORM) supporting multi-tenant workloads
- Leveraged agentic AI development tools (Cursor, Claude) for rapid prototyping, refactoring, and test generation while maintaining production-grade engineering standards
- Delivered a revenue-generating production product with **paying customers**

Salesforce

Jan 2020 – May 2025

Senior Software Engineer

Jan 2024 – May 2025

- Delivered **~30% faster data load times** by architecting lazy loading strategies and asynchronous data processing, while enabling reusable component systems across multiple products and reducing customer implementation issues by **18%**
- Led end-to-end engineering ownership of a major feature redesign to resolve architectural limitations as it scaled into a full product, collaborating closely with product, design, and cross-functional engineering teams
- Improved system performance and reliability by optimizing service APIs, strengthening error handling, expanding observability, and evolving CI/CD pipelines for continuous, stable production releases
- Drove incident management and production support initiatives, leading triage for high-priority internal and external issues to reduce downtime and improve customer experience

Software Engineer

Aug 2021 – Dec 2023

- ▶ Built and scaled a large production mobile application serving **51K+ monthly active organizations and 1.5M+ end users**, integrating automated testing and CI/CD pipelines to ensure reliability and rapid releases
- ▶ Owned resolution of high-priority production incidents (P1/P2) by diagnosing root causes across frontend, backend, and infrastructure layers, significantly improving turnaround time and user experience
- ▶ Drove delivery efficiency as acting Scrum Master by optimizing sprint planning, backlog grooming, and cross-team coordination, increasing sprint completion rate to **~90%**

Junior Software Engineer

Jan 2020 – Aug 2021

- ▶ Proactively transitioned to a software development role following Salesforce's acquisition of ClickSoftware, independently upskilled to meet engineering demands
- ▶ Earned **fast-track promotion** to Senior Engineer through consistent delivery, technical ownership, and cross-team contribution

ClickSoftware

May 2019 – Dec 2019

QA Engineer

- ▶ Developed automated test suites for the location feature in the mobile app, integrating with CI/CD pipelines to ensure reliability and reduce manual QA effort

CORE SKILLS & TECHNOLOGIES

Frontend: React, TypeScript, modern component architecture, complex state management, performance optimization, responsive UI systems

Backend: Node.js, REST APIs, service-oriented architecture, Prisma ORM, PostgreSQL, async processing, webhooks

DevOps & Tools: AI-assisted tools (Cursor, GitHub Copilot), CI/CD pipelines, Docker, cloud deployment, monitoring & observability, automated testing

Practices: System design, scalability, code reviews, Agile/Scrum, incident management, technical ownership

EDUCATION

Ben-Gurion University of the Negev

B.Sc., Industrial Engineering and Management, 2017
B.Sc., Biology, 2013
